corrata

Mobile Security and Data Control

Securing those who protect us

FIRSTNET APP CATALOG ™

Seamless communication and secure devices are essential to mission success by allowing First Responders to react faster in time-critical situations.

Security

Prevent phishing, malware infection and data loss on smartphones and tablets.

Filter and block access to malicious content, including downloads from unoffical app stores.

Remote wipe for lost or stolen devices.

Key Advantages

— ⎯

- ✓ Compatible with any iOS or Android Device, with or without an MDM

- ✓ Simple to deploy and manage avoiding the complex configuration of other solutions

- ✓ User friendly design works unobtrusively in the background

- ✓ Built to maintain user and organization data privacy at all times

- ✓ Service operates on the device, traffic is never rerouted through a proxy, APN or other legacy gateway

☐ Audio

Features

corrata

Mobile Security

Prevent malware infection and data loss with class leading device and network security. Protect user credentials by detecting and blocking the latest phishing scams over email, SMS and social media. Identify vulnerable and misconfigured devices e.g. no passcode set, out-of-date operating system and more. Prevent man in the middle attacks and keep devices safe even on public networks.

Robust Web and App Filtering

Block access to inappropriate content considered harmful or illegal. Keep employees productive and avoid distractions or negative publicity incidents by limiting usage of social media apps and streaming sites on organization owned phones.

Data Usage Control

Simple to implement cellular and Wi-Fi data controls on any phone or tablet. Set daily/monthly data caps on data usage and deny high bandwidth personal apps/websites. Mission critical apps can be allowed at all times so First Responders can always get the job done.

Uncompromising User Experience

The Corrata App operates unobtrusively in the background providing control and security without impacting device performance or user experience. Corrata provides timely, personalized usage alerts and is optimized to have a very low power and memory footprint.

Ease of Deployment

Deployment is a simple, once off, employee friendly onboarding process. Deploy directly from the Apple and Android app stores or through an MDM. All iOS (10.5 or later) or Android (6.0 or later) phones and tablets are supported.

Privacy and Confidentiality

By operating 'on device', Corrata avoids the privacy, confidentiality and performance compromises of gateway-based solutions.

"
We only add applications to the FirstNet App Catalog that are highly secure, high quality, and relevant to public safety. And we're pleased that Corrata is now Listed and available to FirstNet subscribers. Corrata will bring public safety additional capabilities to protect their mobile devices from cyber threats and their employees from malicious, objectionable and unsecure content.
"
